

Play Station Project

Bird feeder

Feed and watch winter birds.

You need:

1 empty plastic bottle

scissors

string

bird seed

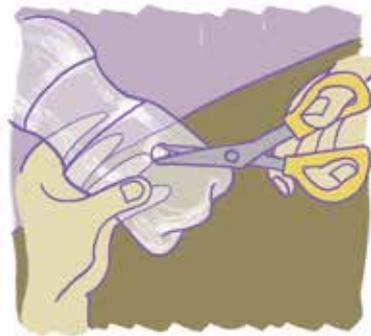

1 Wash the bottle and rinse it well.

4 Fill the bottle with seeds.

2 Cut (or ask an adult to cut) 3 small holes in the sides, about 5 cm from the bottom.

5 Hang your bird feeder from a tree or your balcony. Leaving some seeds on the ground can help the birds find the feeder.

3 Cut or poke two small holes near the top and thread a long piece of string through them.

6 Watch the birds. Be patient and write down what you see.
