

Play Station Project

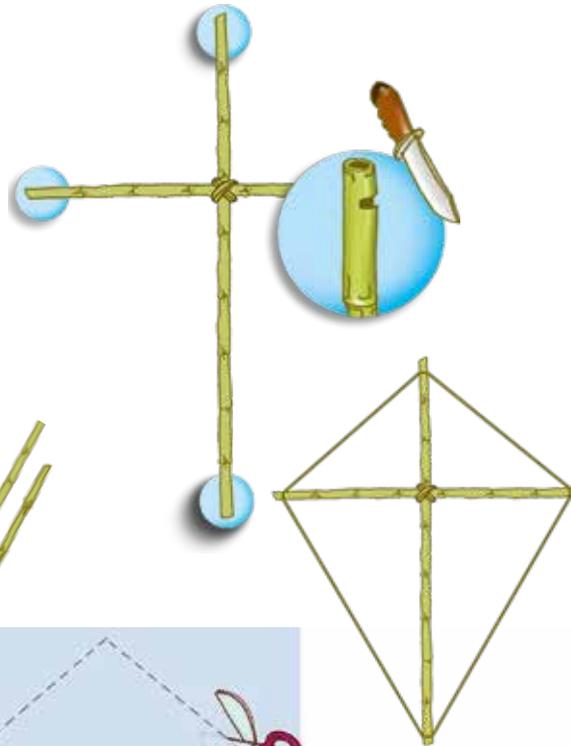

Kite

Make your own kite.

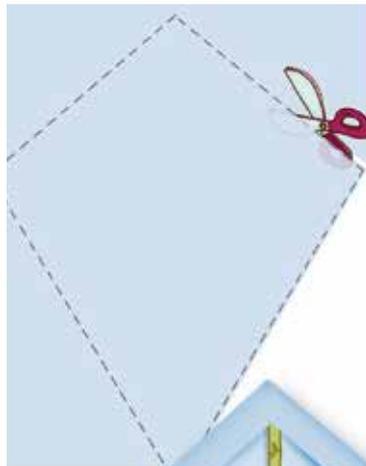

You need:

- string 
- 1 large plastic bag 
- 2 sticks of bamboo (1 of 90 cm, 1 of 60 cm) 
- glue 
- coloured paper
- scissors 
- knife

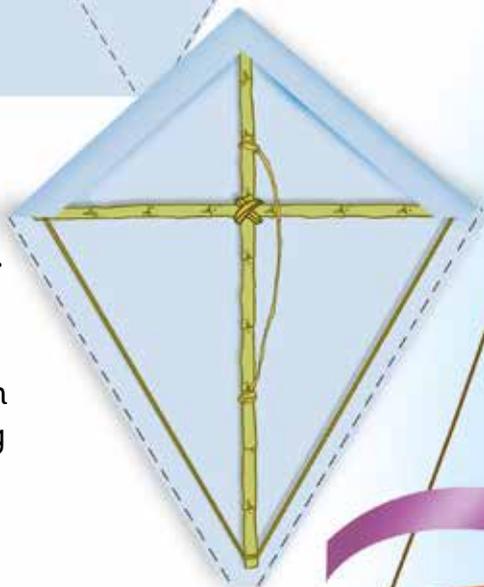

- 1 Make a cross with the two sticks and tie them with the string.
- 2 Ask an adult to make a small cut at the top of each bamboo.
- 3 Pull the string through the cuts and tie it tightly.

- 4 Cut the plastic sail. Make sure it is 2-3 cm bigger than the kite frame.

- 5 Put the frame on top of the plastic sail. Fold the plastic over the string and glue it.
- 6 Tie a piece of string to the top and bottom of the kite. The string must be longer than the stick.

- 7 Tie a long piece of string to the bottom of the kite. Decorate it with pieces of coloured paper. And fly your kite!
